

RoadTech™ B1 for BMW Motorcycles

BMW motorcycles are legendary for innovation, and their choice of fasteners are no exception. Female Torx heads are commonplace, and some models even use rare male Torx bolts. Add special wrench and hex key needs, and it becomes clear that a special kit is called for. We've exceeded these needs with the new RoadTech B1, which packs top-grade tools and other roadside items into a sturdy roll-up pouch. While designed with the GS family in mind, it's just as applicable to other models - new and old. Hand tools are lifetime guaranteed, but more importantly, absolutely dependable when you're in the middle of nowhere.
